Round tubing made to close tolerances and telescopes in 1/8" increments (i.e. 7/8" fits into 1" and 1" fits into 1-1/8", etc.). Tubes can be cut to any length. Assemblies can be 2 sections up to 10 sections, depending on lock style. Stops and overlaps provide bearing and keep legs from pulling apart. Longer overlaps for extra long assemblies can provide extra bearing.

- A** Aluminum "Clutch" Lock with knurl. Trouble-free, all metal.
- B** "Split Collar" locks very securely with ergonomic knob.
- C** Internal "Cam" lock, opens with simple quarter turn.

- D** "Presto" Shock Cord, opens by itself. One constant diameter.
- E** Telescopic & Captive, non locking.
- F** "Spring-Button" opens to specific positions. NR (non rotational) feature included. 3 sections maximum.

- FA** Same as F with additional A Clutch Lock for extra bearing.
- G** "Snap Locks". Ergonomic and economical!
- H** Set Knob, specially designed to limit marring and stay captive.

Option: NR
Non-Rotational. Allows legs to telescope, but not to turn.
